WEEKLY PROGRESS REPORT
On-the-Job Training
2nd Semester SY: 25-26

Student Name: Christopher D. Cariaga Jr. Course/Yr: BSIT 4th Year

OJT Site/Company Name: Symbol Sciences, Inc.

Date Covered: From January 19, 2026, to January 24, 2026 Week #: 5

COMPETENCY: Junior Software Engineer Intern

Duties Perform This Week: • This week, I developed the Asset History Tracking and Audit Trail module, added asset transaction recording, and improved the interface and frontend-backend integration.	
What new trainings/took place this week? • I learned how to implement an audit trail system, manage database relationships, handle activity logging, and improve my Laravel backend, database querying, and Blade frontend integration skills.	
What were your major accomplishments based on the Activities in your Training? • My major accomplishment this week was creating the Asset History Tracking feature, improving asset monitoring, accountability, and system transparency.	
Provide a detailed description of the tasks involved in the accomplishments.	
PROPOSED ACTIVITIES	ACCOMPLISHMENTS
• Developed the Asset History Tracking module with backend and frontend integration • Created and tested the audit trail system for recording and displaying asset transactions	• Built the audit trail database and backend to record all asset actions. • Created the Asset History interface, integrated it, and ensured accurate tracking.
What problems have you encountered this week? • I faced challenges with some asset transactions not logging correctly due to database and backend issues.	
How did you overcome or solve those problems? • I fixed database relationships, debugged the backend, and tested asset actions step-by-step to ensure proper logging.	
List one or two goals you have set for yourself next week. • To develop the Asset Reports and Export Feature for generating asset reports. • To improve the dashboard visualization by adding charts and summary analytics.
